## SUMMARY

I'm Arif, a developer with experience working across multiple companies, building scalable web applications and handling large scale systems. I've integrated platforms like iMessage and WhatsApp, worked with AI technologies to build smart agents, and managed databases with high volume operations. I focus on creating efficient, reliable systems that scale with users and business needs.

---

## WORK EXPERIENCE

### Software Engineer, DNFT Inc.

Aug 2024 - Apr 2026

- Built and scaled Shuffle (AI agent for iMessage), Farcash (mobile wallet), and a Web3 decentralized meme platform.
- Developed real-time, high concurrency systems with WebSockets, caching, and managed high-load databases.
- Designed and implemented interactive UIs with live chat, streaming integration, and seamless user interactions.
- Deployed and maintained production systems using Docker, CI/CD pipelines, and Grafana monitoring.
- Optimized performance, scalability, and reliability across applications, ensuring smooth operation under heavy load.

### Software Engineer, Moksa.AI

Jan 2024 - Aug 2024

- Designed and delivered stunning dashboards for web and mobile applications with intuitive UX/UI.
- Integrated AI agents, live video streaming, and interactive features for real-time user engagement and automation.
- Built scalable frontend systems with WebSockets, caching, and real-time interactions to handle high concurrency.
- Monitored and optimized application performance using Grafana, ensuring reliability and smooth operation under heavy load.

### Software Engineer, Mpaisa FIJI

Jul 2023 - Jan 2024

- Designed and implemented interactive UIs with realtime features like WebSockets, live chat, and user interactions.
- Integrated streaming services and messaging platforms for seamless, real-time engagement.
- Delivered scalable front-end systems supporting high concurrency and smooth user experience.

---

## EDUCATION

### Computer Science and Engineering

Sep 2023 - Present

University of College and Technology

---

## ADDITIONAL INFORMATION

- **Technical Skills:** Full Stack Development, Web & Mobile Apps, AI/Agents, Web3, Database & Caching, Real-Time Systems, Docker, CI/CD, Job scheduling, Proxy management
- **Language/Frameworks:** Next js, Postgres, MongoDB, Elysia, Hono, Bun, Express js, Nest js, Tailwind css, Google cloud, AWS, Grafana, Loki, Pino, Qstash, Redis, BullMQ, Nginx, OpenAI api, Antropic AI api
- **Languages:** English, Bengali, Hindi
